

Catch-22 being that the system-people/system can do anything they can get away with, don't get caught at, I've been trying to explain that they can't do a valid world-takeover by doing it off of all this "Armageddon Show/Program" onto me, that this is only parasitism, a self-limited future by eating the host-victim to extinction. I'm saying that

CATCH-23 is that the system-people's **AUTISM**

AUTISM, is a real medical condition that therefore requires real medical treatment/therapy and making the move to let me out of this old fiction-script "Show/Program" would entail a real-life muscular or brain-synapse exercise to outside of the usual Autist-range of movement, a start on exercise-movement to out of the Autism for the future newborns. I.e.,

when I pass/die this opportunity would be lost, that they can't live off of just looking into this after I'm gone (they can't just steal my material and still win the Armageddon or any such, etc.) Kfishay 4/7/17
